A FIGHTING NEWSPAPER. A correspondent refers to THE EVENING

World as "a fighting newspaper."

But we are fighting not from any innate love of pugnacity, but because there are so many public evils that need to be fought and that can only be overcome by incessant and aggressive action.

If justice could be done the orphan, if bobtail juggernauts could be ruled off our streets, if the people could have the parks that belong to them, if policy sharps and other gamblers could be suppressed by mild suasion, we would prefer that way.

But vigorous attack is the only method that brings results. And that is why THE EVENING WORLD is and will continue to be " a fighting newspaper."

OPEN THE GATES.

New York is the most deficient in parks and open squares of any great city in the

While an effort is making to get more breathing places in the densely populated localities, it is both illogical and shameful to lock up after sunset one of the few little parks that we have.

Stuyvesant Park was given to the people, not to the few rich families whose houses happen to front upon it. The mass of workit is their right to have it.

CHEAPER CLOTHES.

All working people of New York, whatever their politics, are entitled to and are interested in getting cheaper and better clothing, carpets and blankets.

To increase by 67 per cent. the cost of these necessities by a tax that is not needed for the support of the Government is a robbery of the poor.

The vote for free wool in the House is a step towards improving the quality and lessening the cost of clothing. It is honestly believed by many able economists that free wool would also benefit the farmers, as it certainly would the manufacturers.

In reducing useless taxes, those on necessities should be the first to go.

BETTER OUIT.

Two suggestions as to the Burlington and Quincy trouble came in to-day's news.

One is of a general strike by the engineers on the roads running out of Chicago in retaliation for the persecution of the Burlington men. The other is that of Chiefs ARTHUR and SARGENT and Mr. STONE, that the present strikers are willing to resume work "on any reasonable terms that might be offered."

The wise heads of the Brotherhood must be satisfied that it is time to quit the struggle for the present. The dynamite and disabling tactics of Hoge and his associates, though disapproved by the order, have so alienated the public sympathy that even just demands would not be sustained now.

Another " masher " has been mulcted in the sum of \$10. Some of the respectable uptown hote s sought to direct their ngineer to turn the hose on the squad of oglers that stands in front of their doors to the great an-

noyance of decent girls and women. The "big corner in sugar" is costing

The residents of the Sixteenth Assembly District are almost unanimously in favor of the opening of the Stuyvesant Park during the summer evenings.

The only people who are opposed to this boon being conferred on the poor people are a few who own property facing the park.

There are many residents of the district who still believe that when the heirs of the Stuyvesant estate deeded the ground to the city it was with a provise that the gates should be closed at sunset. As has been stated in The Evening Wonld, this is a misapprehension which has been handed down year after year. Mr. Guggenheimer's professional engagements are pressing, but he hopes to be able to meet Mr. O'Brien and with him call upon Mayor Hewitt to lay before him the plan

Anyor riewith to lay before him the plan adopted.

They will ask the Board of Estimate and Apportionment for \$12,000, a modest sum, to be expended in providing lecturers for the first season. That will allow about \$10 for each lecture, and Chairman Guggenheimer fee is assured that that sum will be sufficient for the production of good results.

The lectures will be on natural sciences and kindred subjects.

The committee hope to be able to complete all the details for the season's course by Sept. 15, when they are to make their first report to

"There is no method of instruction so successful as the lecture system, because it pleases while it instructs and the poor people especially will be greatly benefited and improved by the lectures. We do not propose to provide sinecures for lecturers, but trust that those who have instruction to give will in a measure ignit with us and indirection.

will in a measure join with us, and, judging from the communications already received from lecturers of acknowledged ability, we shall not be disappointed."

Of course one lecturer might deliver his lecture three, or by a careful arrangement of dates five or six nights in a week, each an bour long, so that the probable compensation would be a fair sum.

In order that the intent of The Evening World bill may be fully understood its text

is given again:
An act to provide for lectures for workingmen and workingtomen.
The People of the State of New York represented in Senate and Assembly, do enact as follows:
